*various cable lengths available

'Super weld
strength'
adhesive

Cable fixing
plates
(Steel)

Wall and table
mounting brackets

Secures &
ALARMS
computers
and
peripherals
from theft

- **Cost Effective** – can secure multiple pieces of equipment or several computers at a time.
- **High Security** – the **120 decibel alarm** helps deter thieves and attract attention.
- **Quick and Easy to use** – supplied as a simple DIY kit it takes just a few minutes to install. Once fitted, key holders can quickly remove or add equipment at any time.
- **24 Hour Protection** – guards your computers day and night, even when they are in use.
- **Optimum Strength** – the cable fixing plates attach to equipment using 'super weld bond' adhesive. The steel cable is designed to help resist against cutting and sawing. Tamper proof brackets enable the Lock/Alarm unit to be mounted to a wall, floor or table, anchoring your items to a fixed point.

Also ideal for protecting Televisions, VCRs, Audio Systems, Office Machines, Exhibition Displays etc.
